Unified Solution for Managing Appliance Warranties, Insurance, and Document Expirations

Overview

Azzetta provides a comprehensive mobile and web-based solution for managing appliance warranties, identity documents, and insurance policies. The platform includes:

- A **mobile app** for tracking warranties, document validity, and insurance purchases.
- A **web-based admin panel** for monitoring app usage, managing policies, and sending notifications.
- Key integrations include **Digilocker**, **calendar scheduling**, **geo-location services**, and **local business support**.

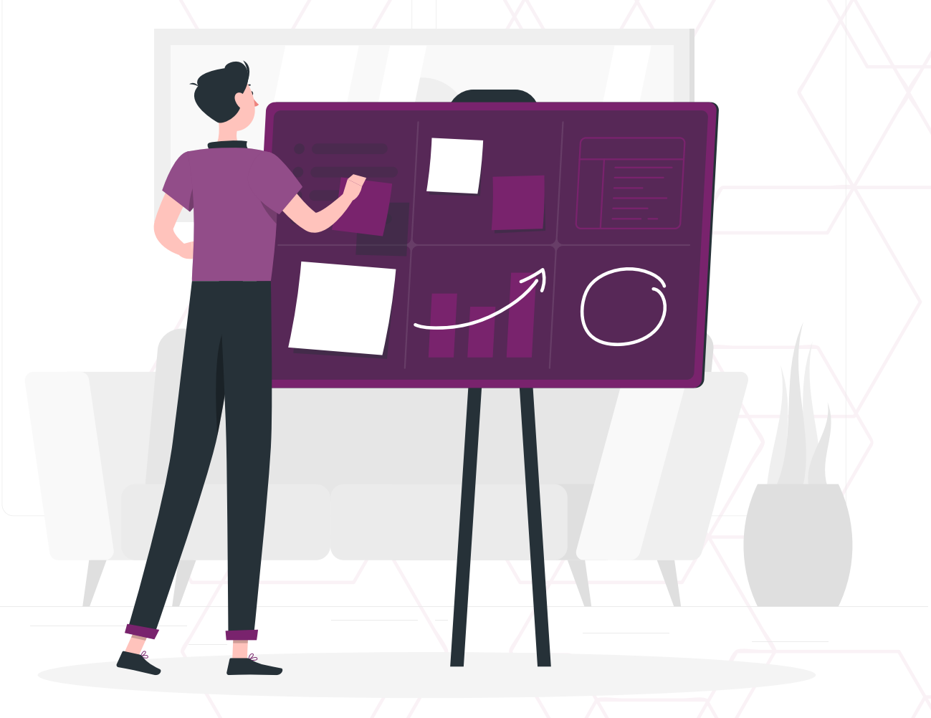
About the Client

The client focuses on simplifying document management for household appliances. They required a user-friendly app to consolidate tracking, reminders, and policy management.

App Functionality

- **Mobile App (React Native)** – Enables users to track warranties, store identity documents, manage insurance policies, set reminders, and receive notifications for expiring documents and services.
- **Admin Panel Website (ReactJS)** – Allows monitoring of app statistics, managing policies, sending notifications, and tracking user activity.

Modules



1. Mobile app modules:

- **Authentication Module** – Secure user login and registration using mobile number and OTP.
- **Appliance Module** – Users can track all home appliances, their warranties, and service histories.
- **Document Module** – Manages documents (like passports, driving licences, and insurance) with integration to Digilocker.
- **Insurance Module** – Allows users to purchase and manage insurance for home appliances and gadgets.
- **DigiLocker Module** – Links the government's Digilocker with the app for secure document access and storage.
- **Reminder Module** – Users can set reminders for appliance maintenance, payment dates, and document renewals.
- **Profile Module** – Manages user details such as name, location, and contact information.

- **Location with Geo-coordinates Module** – Tracks and displays the user's location for various services.
- **Notifications Module** – Sends alerts and reminders for due dates, payments, and scheduled services.

2. Admin Panel Website:

- **Stat and Analytics** – Provides real-time data on the number of app users, policy users, and insurance applications.
- **Common Notifications** – Admins can send global notifications to all users.

Integrations

- ★ **Digilocker API** : For secure document management and retrieval.
- ★ **Google Calendar API** : For scheduling reminders and events.
- ★ **Geo-location Services** : Tracks user locations and adds geo-coordinates to images.
- ★ **Insurance API** : Users can purchase insurance policies directly through the app.

Functionalities

Mobile App

- Store and manage warranties, documents, and insurance details.
- Set reminders and track repair history.
- Filter and manage stored documents efficiently.
- Download and store insurance policies.

Admin Panel

- Monitor app performance and user activity.
- Track policy applications and manage notifications.

Digilocker Integration

- Users can link their Digilocker account to access government documents inside the app.
- The app allows the automatic addition of assets and documents from Digilocker.
- Users can filter files by type (Folder, JPG, JPEG, PNG, PDF) and clear filters as needed.

Insurance Integration

- Users can purchase insurance via the SSG Insurance Brokers tile.
- The Bharat Griha Raksha Policy page details the perils covered.
- After entering KYC details, users can submit the policy application.
- Upon successful submission, the policy is generated and available for download on the Home Contents page.

Local File Storage

- Assets and documents are stored in a dedicated folder named after the app on the user's device.
- Documents and assets downloaded from Digilocker are saved in the same folder.
- Insurance policies downloaded through the app are stored for easy access.

Value Proposition

Efficiency

Automated reminders prevent missed renewals

Cost Savings

Connects users with local repair services

Sustainability

Encourages appliance recycling and reuse

End Users

Homeowners & Tenants

Manage appliances, warranties, and insurance efficiently

Admin Users

Oversee app performance, user activity, and notifications

Technology and Tools

Mobile Front-End :

React Native – A JavaScript framework for building cross-platform mobile apps

Web Front-End:

React JS – A JavaScript library for creating user-friendly interfaces.

Backend :

Node JS – A JavaScript runtime environment used for server-side operations.

Database :

MongoDB – A NoSQL database for storing app data.

Digilocker Integration:

For document storage and management via API.

Google Calendar Integration:

To schedule reminders and events

Geo-location Services:

For tracking and adding geo-coordinates to images.

Support & Maintenance

The Azzetta platform receives continuous updates for improved functionality and security, including:

- **Regular updates** for the React Native framework and associated libraries.
- **Version upgrades** to improve compatibility with the latest devices and operating systems.
- **Bug fixes** and **performance enhancements.**
- **Support for new features** such as adding new appliances, documents, reminders, and upgrading the insurance module.

Azzetta provides a robust, user-centric solution for seamless document and policy management, ensuring efficiency for homeowners and administrators.
