Community-Supported Reporting to Enhance Parked Vehicle Safety

About the project

The solution is a web application designed to keep vehicle owners informed about potential incidents affecting their cars, such as tickets, towing, or damages, by creating a **community-supported reporting system.** With secure **QR codes** and **anonymous reporting**, this app enhances **parking management**, improves **community safety**, and promotes **cost savings** for car owners. The solution is versatile and combines easy-to-use technology with **effective safety alerts**, making it valuable for cities, residential communities, and businesses managing large parking areas.

Client Requirement

The client requested a **complete web application** that allows car owners to receive alerts about potential issues or risks to their parked vehicles.

Core needs included:

- **Vehicle safety notifications** through SMS alerts.
- **QR code-based reporting** for passersby to notify vehicle owners.
- **Community involvement features,** like incentivizing users who report vehicle issues.
- **A user-friendly interface** for both vehicle owners and passersby.

Modules

Vehicle Safety Alerts:

- **Notifications :** Implement a system to send alerts based on vehicle status and parking time.
- **QR Code Reporting :** Allow passersby to scan QR codes to report potential threats or issues.
- **SMS Alerts :** Develop functionality to send periodic SMS messages and handle responses.

Community Involvement:

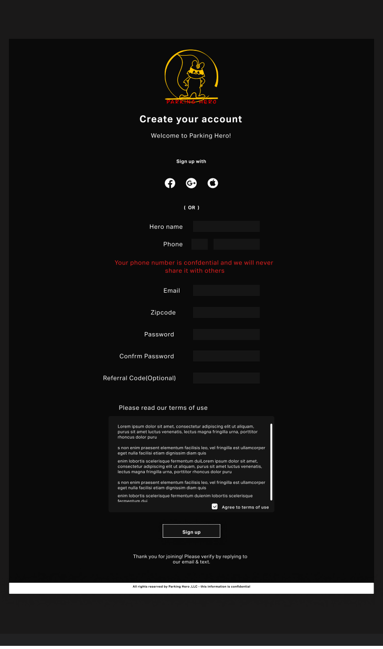
- **Incentives :** Develop a reward system for individuals who actively participate in vehicle safety.
- **User Interface :** Ensure the system is intuitive and accessible for all users.

Features

- **Incident Alerts :** Real-time notifications sent via SMS.
- **QR Code Scanning :** Enables reporting without sharing personal contact details.
- **Reward System :** Incentives for users reporting issues.
- **Safety and Security :** Maintains user anonymity, and prohibits solicitation.

How does the Product work?

- ○ Users create an account, verify their email and phone, print a QR code, and place it on their car.
- ○ Passersby can scan the QR code, select the type of incident, and send an alert to the car owner.
- ○ Alerts allow car owners to prevent tickets, towing, or other issues by moving their vehicles if needed.



Welcome to Parking Hero!

Your phone number is confdential and we will never share it with others

End Users

- **Car Owners :** Receive alerts for incidents involving their vehicles.
- **Passersby :** Can scan the QR code to report vehicle-related issues.

Tech Stack

Frontend	Backend	Database	Hosting
React	Django	Postgre SQL	AWS

Support & Maintenance

- ○ **Ongoing Monitoring :** Continuous error tracking and real-time monitoring using Sentry.
- ○ **Cloud Infrastructure :** AWS ensures stability and scalability.
- ○ **Regular Updates :** Maintained and updated periodically to meet new requirements and keep performance high.

About Soft Suave

Soft Suave is a prominent IT outsourcing and software development company with a rich history of serving global clients for more than eleven years. with our core expertise in IT staff augmentation, we assist businesses in augmenting their existing workforce by providing skilled professionals. our team consists of talented, knowledgeable, and dynamic developers who are devoted to offering revolutionary and effective technology solutions. we offer tailored solutions that meet the unique needs of our clients, and our customer-centric approach ensures that our clients are involved at every stage of the project.

Development Center - Chennai

Soft Suave Technologies Pvt Ltd,
No.100, Kundrathur Main Road, Porur,
Chennai – 600116, Tamilnadu, India.

Development Center - Bangalore

Soft Suave Technologies Pvt Ltd, Gayatri
Tech Park (4th floor), Kundalahalli,
Whitefield, Bangalore - 560066.
