DRIVING LOGISTICS EFFICIENCY WITH A SCALABLE DELIVERY MANAGEMENT SOLUTION

A CASE STUDY

softsuave.com

About The Solution

Introduction

We built a comprehensive delivery management solution, consisting of a web app and three specialised mobile apps designed for different user roles: Admin, Driver, and Loader. Each app provides tailored tools to meet the specific needs of its users, ensuring efficient, real-time control over logistics operations. This setup supports end-to-end visibility and management across the entire delivery process, allowing users to respond swiftly to issues and maintain high service reliability.

Product Type

A comprehensive web and mobile application designed for delivery management.

Client Requirements

System Development
Needed a custom-built logistics solution from scratch, accessible on both web and mobile.

Real-Time Delivery Tracking
Required live tracking of shipments to quickly respond to delivery issues.

Alerts & Notifications
Flexible alerts for delays, damages, and incomplete deliveries to keep the team informed.

User-Friendly Design
Easy, intuitive interfaces for users with minimal training.

Integration Compatibility
The system must work with existing barcoding, labelling, and logistics tools.

Scalable & Flexible
Adaptable design for future growth and changing needs.

Continuous Improvement
Built to support updates, with an eye on improving logistics processes.

Solution Modules

Modules Common To Web and Mobile

Delivery Management Module: Manages shipments and deliveries with real-time updates, status tracking, and route optimization.

Tracking and Monitoring Module: Provides real-time location tracking of delivery vehicles and shipments (AGM Map for web and Google Maps SDK for mobile).

File Management Module: Handles secure uploads/downloads of files like load sheets, stored on AWS S3.

System Configuration and Settings Module: Configures system settings, alerts, and notification criteria.

Support and Maintenance Module: Ensures continuous improvements, monitoring, and performance.

Web-Specific Modules

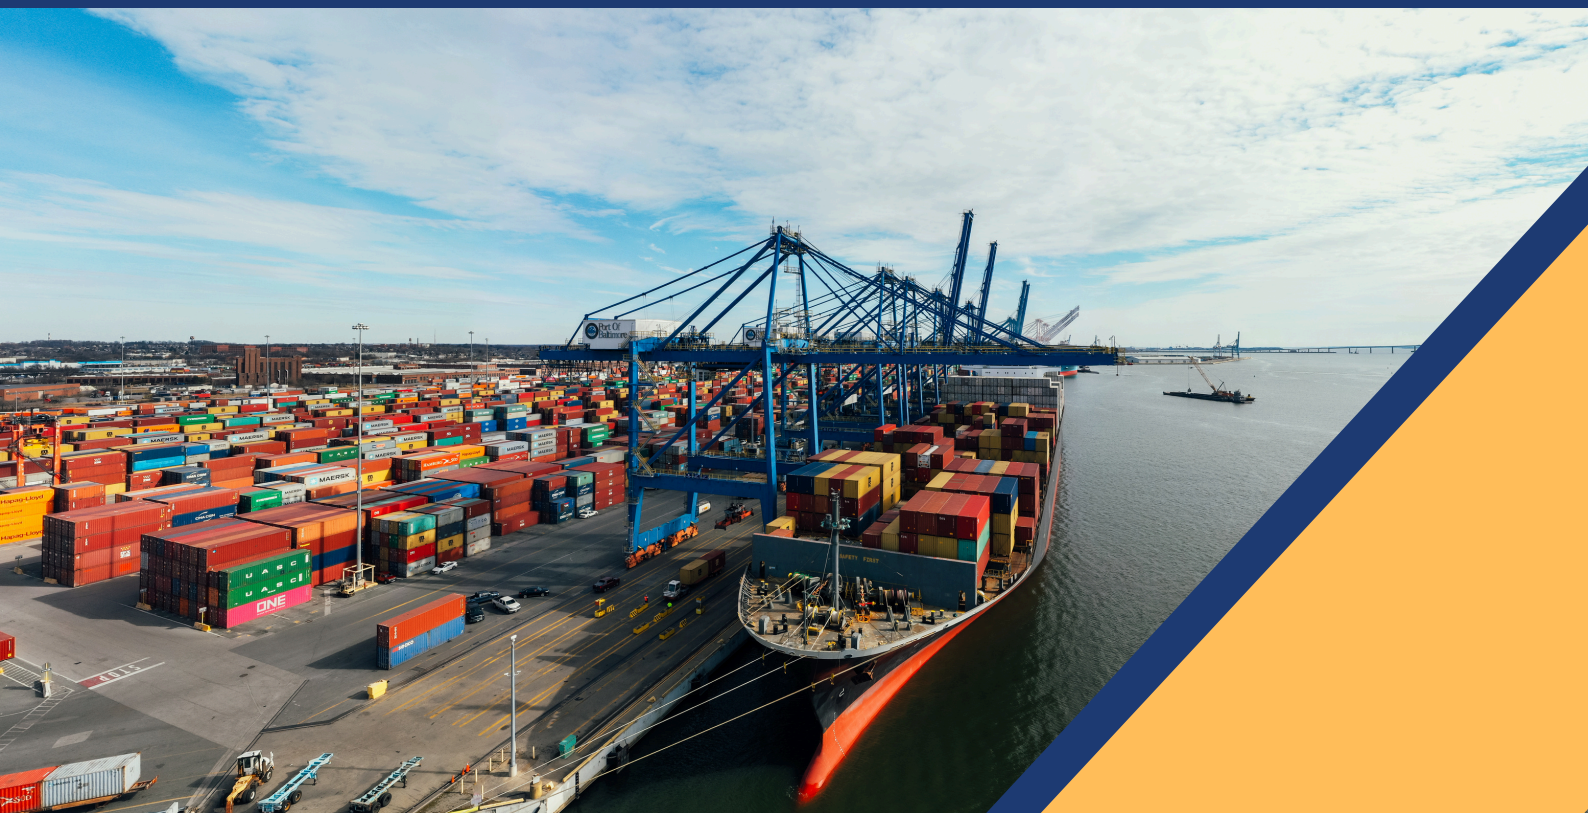

Reporting and Analytics Module: Uses Jasper Reports for generating detailed delivery performance reports and logistics metrics.

Alert and Notification Module: Configurable alerts via AWS SES (email) and AWS Pinpoint (SMS), alerting users to issues like delays or damages.

User Management Module: Manages user roles, permissions, and access controls, ensuring appropriate access for various user types across the platform.

Solution Features

- Real-time Delivery Monitoring
- Location Tracking
- File Storage & Transfer
- System Security & Access Control
- Configurable Alerts & Notifications
- Reporting & Analytics

Apps & User Roles

WEB APP

Users: System Admin, Super Admin, & SuperDriver

Features: Shipment oversight, user role management, real-time tracking, and customizable alerts for timely responses

Integrations: AGM Map for tracking, Jasper Reports for reporting, AWS SES and AWS Pinpoint for notifications, SQL Database, and AWS S3 for secure file storage

ADMIN MOBILE APP

Users: System Admin and Super Admin

Features: Shipment monitoring, role management, mobile-optimized access to logistics data, and document storage

Integrations: AWS S3 for document storage

DRIVER MOBILE APP

Users: Drivers

Features: Real-time tracking, document upload to AWS S3, barcode scanning, document scanner, user manual, and video tutorials for guidance

Integrations: Google Maps SDK for tracking, AWS S3 for document upload, Google ML Kit for barcode and document scanning

LOADER MOBILE APP

Users: Loaders

Features: Barcode scanning for accurate loading, backend submission for real-time tracking updates

Integrations: Google Maps SDK for tracking, AWS S3 for document upload, Google ML Kit for barcode and document scanning

Tools

Support

- Monitoring

Regularly tracked system and app performance to ensure stability.

- Issue Resolution

Addressed and resolved post-deployment issues and bugs promptly.

- Updates and Enhancements

Implemented updates and improvements based on client feedback and evolving needs.

- Technical Support

Delivered ongoing assistance to ensure the app consistently met client requirements.

Soft Suave Technologies

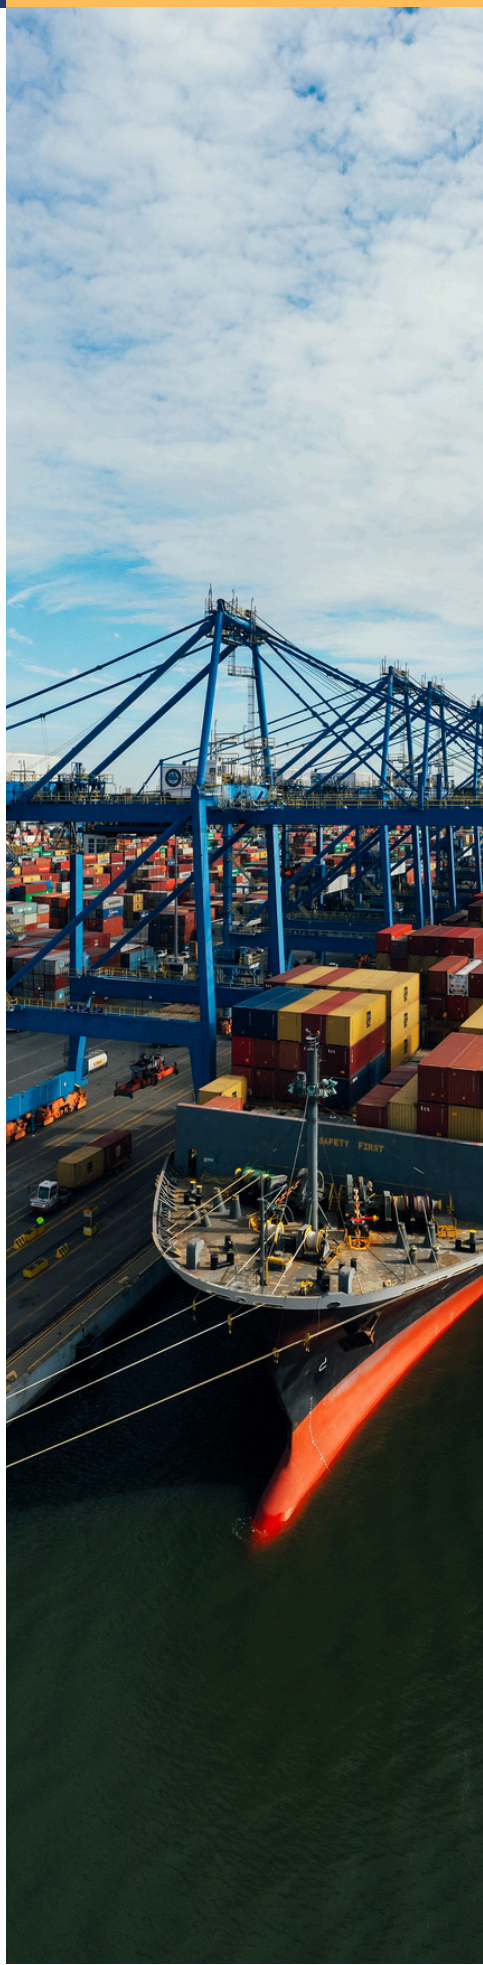

ABOUT SOFT SUAVE

Soft Suave is a prominent IT outsourcing and software development company with a rich history of serving global clients for more than eleven years. with our core expertise in IT staff augmentation, we assist businesses in augmenting their existing workforce by providing skilled professionals. our team consists of talented, knowledgeable, and dynamic developers who are devoted to offering revolutionary and effective technology solutions. we offer tailored solutions that meet the unique needs of our clients, and our customer-centric approach ensures that our clients are involved at every stage of the project.

Development Center - Chennai
