Well Pet

An AI-Powered Smart Wellness Platform Revolutionizing Pet Healthcare

Bringing smart monitoring, AI-driven health assessments, digital medical records and preventive care together in one platform — so pet parents can track wellness, manage medications and vaccinations, and catch potential health concerns early, with veterinarians kept fully in the picture.

INDUSTRY	SCOPE	ENGAGEMENT
Pet healthcare & veterinary technology	AI assessments, assistant, digital records, reminders, vet dashboard	End-to-end platform design, development & delivery

01 — ABOUT THE CLIENT

Making pet wellness intelligent, not incidental

The client is a pet healthcare technology company on a mission to transform traditional pet wellness management through intelligent digital solutions. Their platform serves two audiences at once: pet parents, who want an easier way to stay on top of their pets' day-to-day health, and veterinarians, who need complete, reliable visibility into each animal's history. Both depend on AI-powered monitoring, wellness tracking, health assessments and preventive care tools to keep pets healthier for longer.

02 — THE CHALLENGE

Pet care was fragmented, manual and reactive

Fragmented, scattered records

Pet medical records were split across multiple clinics and visits, leaving no centralized view of a pet's overall wellness and history.

Guidance gaps between visits

Pet parents had limited access to veterinary guidance between appointments — and no expert support for spotting early signs of health issues.

Manual wellness routines

Medications, vaccinations and wellness routines were managed by hand — easy to miss, and hard to keep consistent across a pet's life.

Reactive, not preventive

With no proactive health monitoring or preventive care tracking, problems tended to surface late instead of being caught early.

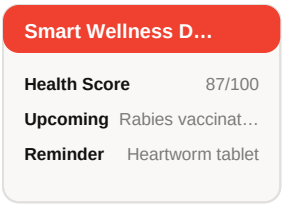
03 — THE SOLUTION

One AI platform for the whole wellness journey

Soft Suave delivered a centralized, AI-powered pet healthcare platform — automated health assessments, digital medical records, intelligent reminders and real-time insights in one place, so pet parents manage vaccinations, medications, wellness activities, weight and medical history from a single dashboard, with veterinarians given complete visibility.

01 Smart Wellness Dashboard

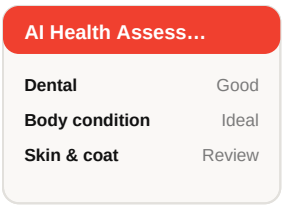
Vaccinations, medications, wellness activities, weight tracking and full medical history managed from a single dashboard — with smart reminders and real-time notifications keeping every routine on schedule.



02 AI Health Assessments

6 WELLNESS AREAS

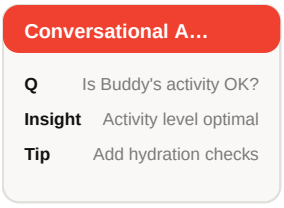
AI-based assessments covering dental health, body condition, skin, eye, ear and digestive wellness — helping pet parents identify potential health concerns at an early stage.



03 Conversational AI Assistant

24/7 GUIDANCE

An always-available assistant providing instant health guidance and personalized recommendations based on each pet's profile and medical history — closing the gap between veterinary visits.



One intelligent platform connecting pet parents and veterinarians — every record, reminder and recommendation in a single place, built to catch concerns early.

04 — KEY FEATURES

Twelve capabilities, one platform

- AI Pet Health Assistant (24/7 Guidance)
- Personalized Recommendations per Pet Profile
- Digital Pet Medical Records
- Centralized Wellness & Weight Tracking
- Smart Medication & Vaccination Reminders
- Preventive Care Scheduling & Tracking
- AI Health Assessments (Dental, Skin & More)
- Real-Time Notifications & Wellness Insights
- Veterinary Dashboard with Full Health Visibility
- Automated Veterinary Document Processing
- Secure Subscription & Payment Management
- Early Health-Concern Detection via AI

05 — RESULTS & IMPACT

Measurable impact for pet parents and veterinarians

90%
Reduction in manual medical record entry effort

60%
Faster health data processing and AI response handling

50%
Improvement in preventive care tracking through automated reminders

99.999%
Platform availability for uninterrupted access to pet health data

Figures represent reported outcomes of the platform as delivered for this engagement.

WHY SOFT SUAVE

Healthcare-grade AI, consumer-grade experience

Building for pet healthcare means earning the trust of two very different users at once — pet parents who need simplicity, and veterinarians who need clinical completeness. Soft Suave delivered both: AI assessments and a conversational assistant grounded in each pet's real profile and history, automated document processing that removed 90% of manual record entry, and a scalable architecture holding 99.999% availability. The result turned reactive pet care into proactive, preventive wellness management — and laid a foundation for continued digital veterinary innovation.
