

ENHANCING DIGITAL SIGNAGE WITH ADVANCED AD SCHEDULING AND CAMPAIGN MANAGEMENT

About the Client

The client is a leading digital services company with over 20 years of experience in driving digital transformation across various industries. They specialize in custom product and application development, cloud engineering, and UI/UX design. The client supports startups with a specialized program designed to accelerate their growth and innovation.

Solution Overview

The solution provided involved integrating an advanced scheduling and campaign management feature, "Capsuling," into the client’s existing digital signage application. This feature enabled more precise control over ad occurrences and scheduling, improving campaign effectiveness and streamlining content delivery for mobile and TV advertising.

Key Challenges

01 Inefficient management of ad campaigns across multiple devices and time slots.

02 Lack of control over the number of times specific ads were displayed.

03 Complex scheduling of campaigns with varying durations.

04 Difficulty integrating new features without disrupting existing functionality.

Client Requirement

- Advanced scheduling capabilities for ad campaigns.
- Ability to manage and control ad occurrences within a set time.
- Integration of a new capsuling feature to handle complex campaign scheduling.
- Seamless integration with the existing mobile and TV applications.
- Reliable ad playback and scheduling across all devices.

Business Solutions

Capsuling Feature
A precise scheduling system that allows the client to control how often each ad is shown within a defined time, distributing ads efficiently across devices and time slots.

Planogram Scheduling
A feature that enables users to schedule ads to run at specific times, ensuring that each campaign runs on designated devices without overlap or conflicts.

Proof of Play Snapshot
This feature automatically captures and logs screenshots of ads as they play, providing verifiable proof of playback for advertisers and ensuring transparency.

Moving Wall Widget
A dynamic content widget that fills gaps between scheduled ads by showing external content, ensuring continuous screen usage even when no new ads are available.

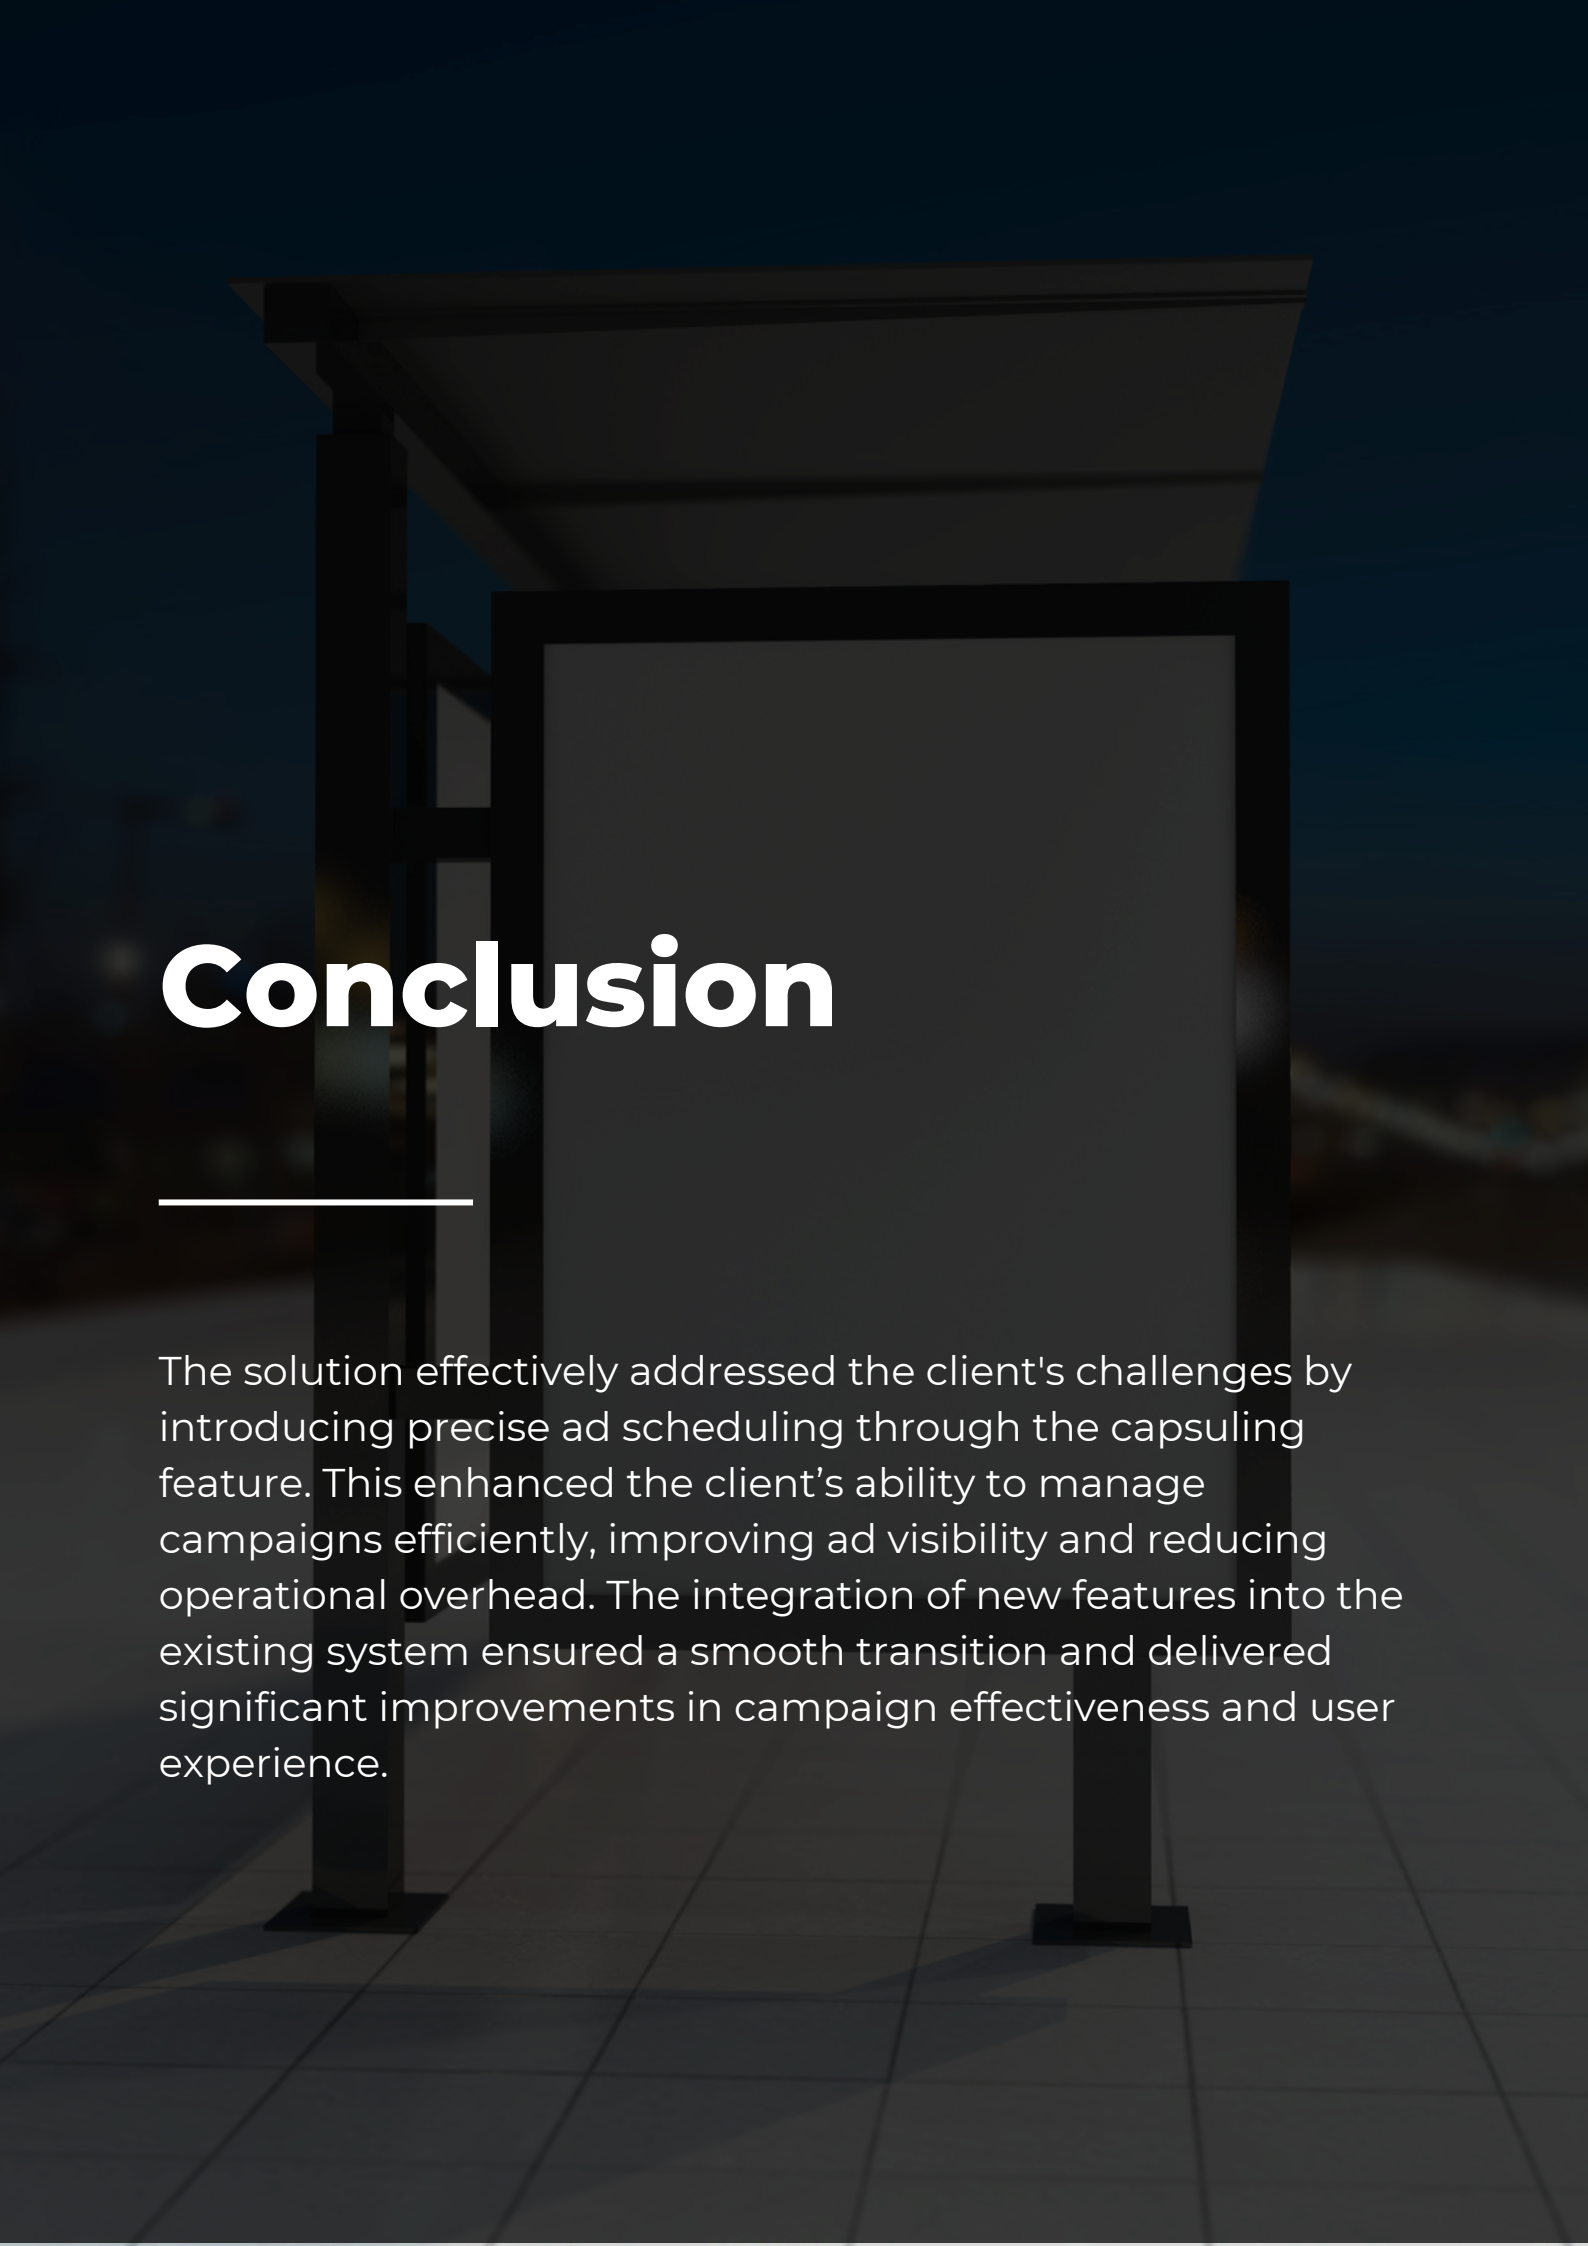

Results & Impact

70% reduction in scheduling errors and conflicts.

3x increase in ad campaign effectiveness due to precise scheduling and content distribution.

50% faster content setup and management due to the streamlined user interface.

90% reduction in manual intervention for campaign management.

Conclusion

The solution effectively addressed the client's challenges by introducing precise ad scheduling through the capsuling feature. This enhanced the client’s ability to manage campaigns efficiently, improving ad visibility and reducing operational overhead. The integration of new features into the existing system ensured a smooth transition and delivered significant improvements in campaign effectiveness and user experience.
