

DELIVERING A HIGH-PERFORMANCE TRADING SOLUTION FOR OPERATIONAL EFFICIENCY

Soft Suave
The smart way...

ABOUT THE CLIENT

The client is a global financial services provider offering multi-asset trading capabilities to retail and institutional investors. They prioritize secure, compliant operations while delivering efficient and intuitive trading experiences to end users.

SOLUTION OVERVIEW

The solution is a dedicated front-end trading application built to support real-time market analysis, trade execution, and portfolio management. It integrates seamlessly with the client's backend systems while maintaining a clear boundary for frontend-only development responsibilities.

CLIENT REQUIREMENT

- Secure login system
- Real-time trading interface
- Integrated charting and market analysis tools
- Watchlist and equity tracking
- Trade execution with position and order management
- SL/TP (Stop Loss/Take Profit) automation
- Historical trade records and performance tracking

Soft Suave
The smart way...

BUSINESS SOLUTIONS

01. Investor-Focused Login Module:

Developed a secure, Angular-based login system with password recovery and email verification, ensuring only pre-authorized users could access the application.

02. Integrated Trading View Charts:

Implemented interactive charts with various visualization types and drawing tools, enabling users to analyze market trends and make informed trading decisions.

03. Advanced Equity & Watchlist Module:

Created a user-friendly equity panel with a customizable watchlist that tracks trending symbols across asset classes like forex and crypto.

The smart way...

BUSINESS SOLUTIONS

04. Comprehensive Trade Management:

Designed a full-featured trading tab supporting live trades, pending orders, and detailed specifications for each symbol, including market hours and conversion rates.

05. SL/TP Automation Features:

Enabled automated execution of trades based on user-defined stop-loss and take-profit levels, reducing risk and manual oversight.

06. Historical Data Tracking:

Built a history module that logs executed trades with volume, timestamps, P&L, and user comments for performance review and audit purposes.

RESULTS & IMPACT

40% improvement in user engagement through real-time charts and trading features

3x increase in usage of SL/TP features after automation was introduced

Consistent **99.9%** uptime and performance stability for all trading sessions

CONCLUSION

Soft Suave helped build a secure and easy-to-use platform for trading. They implemented an admin-controlled account creation system and added advanced trading tools to make the platform reliable and user-friendly. With features like automated trading actions, users can now trade with confidence. Soft Suave's work made the platform more efficient and trustworthy for traders.
